

Consent for forensic analysis

I, _____, voluntarily agree to work with **EXAMPLE ORGANIZATION**, onward referred to as THE ORGANIZATION, in the analysis and investigation of my electronic device(s) and/or online accounts, potentially targeted or compromised with spyware or other malicious software.

During the investigation, THE ORGANIZATION **will collect and analyze digital information with the goal of establishing verifiable hypotheses of potential digital attacks**. The information to be collected by THE ORGANIZATION includes:

- EXAMPLE: Android Bugreport

In particular, I give THE ORGANIZATION permission to publish the following information in publications, including blog posts and public reports:

☐ My name and affiliation (e.g., the relevant organization or community group).

☐ I want my identity to be anonymous.

I acknowledge that allowing THE ORGANIZATION to publish my name as part of the investigation may create a risk to my security.

I acknowledge that THE ORGANIZATION might have access to private and/or sensitive information during the course of the investigation. THE ORGANIZATION commits to managing this information under strict confidentiality and data management policies. Once the investigation is complete, I request to THE ORGANIZATION

☐ That my information is included in a pool of collections for future analysis

☐ That any information related to my devices is eliminated after the analysis is complete

Considering the above, I hereby confirm I provide this information voluntarily. I have read and understand this document and agree to its terms.
